Tiers-Lieu
Contributory Platform For Technology Intelligence, Innovation and Foresight

17th February 2016   9:00 - 17:00

Develop and imagine together the innovative services of tomorrow

Context

As technologies can be considered independently of the domain of application, we believe that creating a contributary platform providing some structured information about technologies could be of common general interest at governmental and industrial level, both national and international.
There are some parameters strategists need to understand about technology (definition, strength, weaknesses, readiness, etc) independently of the industry they work for.

We believe in the creation of a level of information that can be shared; that the sensitive and confidential aspects are how technology is used and the decisions that derived from it, but not necessarily the information on technology itself.

The armasuisse Science and Technology (S+T) Foresight Program anticipates and gets the necessary understanding of the emerging technologies. This is a continuous process which increasingly considers dual-use technologies as well as their combinations. To perform this task, the Foresight Program has sponsored a technology platform that could be considered as the 'available heritage' to build the vision.

This Tiers-Lieu for the development of a contributory technology platform takes place to better understand and identify the needs, the stakeholders and the way forward towards its realization.

Program

08:30	Registration + Coffee
09:00 - 09:40	Introduction, Presentation of the context *Quentin Ladetto - armasuisse S+T & Michell Zappa - Envisioning Ltd*
09:40 - 10:35	Contributive Economy & Contributive Developments *Prof. Michel Leonard & Lionel Lourdin - CINTCOM Foundation* *Jean-Baptiste Guillet - Open Business Foundations*
10:35 - 10:45	Questions & Answers
10:45 - 11:15	Coffee & Networking
11:15 - 12:30	Start of the group work
12:30 - 13:30	Lunch - Buffet
13:30 - 16:00	Group work
16:00 - 17:00	Synthesis of the different groups and outcome of the day
17:00	End of the day

Founding Principle

All work and results of the day will be archived on the Internet and placed under free licenses types CC BY-SA, GNU GPL, CERN OHL (or compatible) so that each participant can freely use, share and perpetuate the work and innovations achieved.
