

TITLE

Secure critical infrastructure

CHALLENGE

Interdict an unmanned attack against an electricity distribution site

RED

Challenges posed, tactics and technology

- Electricity is essential for the BLUE forces functioning as well as for the maintenance of basic services and the prevention of further panic among the population.
- RED wants to disrupt electricity distribution for exactly these reasons (and to make the government look weak and impotent to ensure provision of basic services for the population) and has unmanned means to do so.

BLUE

Objective and associated tasks

- Secure critical infrastructure.
- Interdict unmanned air attacks (by swarm).
- Destroy/neutralize swarm of armed unmanned aerial vehicles.

Use the technologies and your imagination to create systems that will help BLUE to achieve their objectives!
